TO OUR FRIENDS AND CUSTOMERS

We wish to thank you for your patronage and we are offering this, our 1932 catalogue, with many more varieties of gladiolus, all selected from the best of the newer introductions.

Our stock is better than ever before. Our prices are lower and even our service has improved, if that be possible.

So we say to you — Let us make the year 1932 brighter and happier by planting more and better "glads."

Gladly yours,

MR. and MRS. W. H. KINGSLEY.

P. S.—If you are not interested in this catalogue, please do not destroy it, but hand it to a friend who loves flowers.
Sincerely yours.

« Read This Carefully »

All the varieties in this catalogue have been thoroughly tested and tried and are the best obtainable.

Each year we try the new ones and retain those which show advancement over the older varieties.

It is impossible to grow all the good glads, so we have to discard a few each year to make room for the newer ones.

We guarantee all stock to be true to name.

We cannot guarantee results, as growing conditions are beyond our control, but send out only vigorous, healthy bulbs.

**About Our Discounts**

All cash orders are subject to the following discounts:
- On orders of $5.00 to $14.00 a discount of 10% in bulbs of your selection
- On orders of $15.00 to $39.00 a discount of 15% in bulbs of your selection
- On orders of $40.00 to $99.00 a discount of 20% in bulbs of your selection

Your selection for the above discounts can be made from any of the varieties in this list, except Ava Maria, Lighthouse, Magna Blanca, Picardy, Pirate and Ramesses, as our stock of these is small.

Please do not order smaller quantities than listed.

All orders will receive careful attention and will be filled to your satisfaction; we do not promise the Earth, but we promise to please you.

Each season our business more than doubles; there is a reason for such growth—satisfied customers are our greatest asset.

**About Prices**

Prices in this catalogue supersede all prices in previous lists. The prices of the different varieties are as low as is consistent with good, well grown stock and selected bulbs. Prices are per each bulb, twelve bulbs of one variety for ten times the price of one, except where otherwise noted.

**About Sizes**

Commercially the Gladiolus is divided into six sizes: No. 1 is over 1 1/2 inches in diameter; No. 2 is 1 1/4-1 1/2; No. 3 is 1-1 1/4; No. 4 is 9/16 to 1; No. 5 is 3/4-9/16; No. 6 to below 3/4 inch. For retail trade Nos. 1 and 2 are called large by most growers and No. 3 medium. These are my sizes. But a few growers call No. 3 large and Nos. 4 and 5 medium. Such growers can make very low prices. Be sure what size the grower is offering for the money.

Send us your order early, the stock of some of the best varieties is very limited. If out of a certain variety we will not substitute unless asked to do so, but we will, when out of large bulbs, fill your order with double the amount in smaller size of same variety.

All bulbs and bulbets listed in this catalogue are offered and orders accepted subject to prior sale and causes beyond our control.

Full cultural directions included with every shipment. Cash should accompany all orders.

Remittance should be made by Post Office Money Order, Express Money Order or Bank Draft.

All orders will be delivered prepaid to all points reached by Parcel Post. No orders of less than $1.00 accepted.

Please write your name and address very plainly.

Prices quoted and orders accepted subject to prior sale.

QUALITY FLOWERS FROM QUALITY BULBS

Our glads are grown in strong black soil which does not require fertilizer to put plenty of pep in the bulbs. Our flowers won for us eight first prizes, nine seconds and one third out of twenty-one entries, at the East Bay Gladiolus Society show, Oakland, California, last July. Our own Adelfa and Tennyson won first in their respective classes against keen competition.

Your flowers will win for you if you plant the right kind of bulbs.

California Grown
Gladiolus Bulbs

When we consider that the Gladiolus is found in the natural state in Southern Europe, Asia Minor and Southern Africa, particularly in the coastal districts from Namaqualand to Natal, it seems quite natural that we should grow the best of glads in California where the climate approximates that of the Gladiolus native habitats. Nowhere in this country can better bulbs be produced.

Our bulbs have a long season in which to grow; they are not forced and matured before their time by torrid heat, as our particular section of California possesses the most equable climate in the United States.

We have no hurricanes to break the stems, no pelting rains to batter the flowers.

No rain from April to November, yet we have an abundance of water and, with the Skinner irrigation system, our glads receive just the proper amount of water, and just at the proper time to grow them to perfection.

When our bulbs are harvested they are fully matured, and our dry fall season permits of curing them in the mild sunshine.

Our storage facilities are of the best and, in the spring, when our bulbs reach you, they are vigorous and ready to grow.
